MAINTENANCE

the inside drawers are also rounded for the same purpose.

All the internal elements (guides, racks and condensation trays) can be removed without tools for cleaning.

The entire refrigerating unit is fitted on to a guide and can be pulled out from the front to facilitate extraordinary maintenance operations.

The magnetic gaskets on doors and drawers are easily replaced without tools.

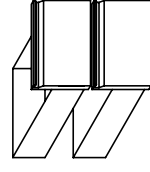

Maximum accessibility and safety facilitate all maintenance: the lower part of the front control panel is also removable without the need for tools to allow regular cleaning of the condenser even by unskilled personnel.

For more important operations, our "intelligent" system is able to assist your engineer's work with an impressive quantity of historic data in real time.

OPTIONS / ACCESSORIES

There are 3 drawer compositions: 2 drawers, 3 drawers, 1 drawer to your requirements.

Also available are locks for doors, a steel grid to protect the evaporator, stainless steel odour separator or 4 compartments).

Remote refrigerator units are available for both fridges and freezers with a water evaporator tray with a filter for remote models.

- We also have at our customers' disposal:
- custom made work tops (top metal used, work top height adjustable)
 - type of splashback, rounded corners
 - HACCP solutions with the printer
 - refrigerated wells with independent temperature control
 - "saladette" type holes for cutting

Finally, when maintenance has been carried out, a self-diagnosis test can be launched: operation of your fridge is controlled electronically so that you can be certain everything is working perfectly!

THOSE WHO CHOOSE IGLU KNOW THEY CAN RELY ON PROFESSIONAL SKILLS, RELIABILITY AND EFFICIENCY.
